ALPINE INDUSTRIALCON (PVT) LIMITED plays an important role in the overall economic development of the country. This is more so in the developing country like Pakistan , especially in the Defence Sector, where the experience of last many decades has proved that the dependence on the foreign sources not only deprive the country of technological advancement but has proved to be detrimental to the national interests. In order to achieve self-reliance in Engineering sector and proved quality goods within country, Alpine Industry was established some forty years ago with its head office at Lahore. Initially we undertook the manufacture of high-pressure pipe fitting and valves for the Petro-Chemical Industry. With ever increasing demands of construction sector, we diversified the products and started manufacture of spun pipes and variety of fittings. Alpine Spun Pipe and fittings have now achieved the name for its quality and trouble free service.

With the emphasis on self-reliance on defence production a major balancing and reorientation of our production facilities was subsequently initiated and with the grace of Almighty Allah, we have been contributing in our own humble way, in this sector for over decay now.

The Alpine Industries are mainly housed at Baghbanpura, Lahore on main G.T. Road. Its recent addition is Alpine Heavy Forge at Hattar Industrial area near Taxila. The group consists of following divisions:-

a	Alpine Industrialcon (Pvt.) Ltd.	Deals mainly with Defence Production
b	A-One Traders, Lahore	Trading and marketing house for Alpine Pipes and commercial products
c	Alpine Heavy Forge (Pvt.) Ltd.	Specialized facility for the manufacture of special products.

Where It Costs Less To Get The Best
